DELIVERY

DISCUSSION

At deMaher we provide innovative customised solutions to an endless number of industrial operational issues. Our 4D philosophy. Combined with our highly experienced technical staff will:

- **Discuss** the issues you are currently facing and analyse your existing processes
- **Design** an effective solution which integrates with your current infrastructure and present you with options
- **Develop** your product or process, from modelling and testing to prototyping the production and fabrication, ensuring the quality and integrity of your product.
- **Deliver** and reconfigure your existing equipment. We take care of all the logistical requirements to ensure minimal down time during installation of the final solution.

DESIGN

industrial design that delivers

deMaher is where ingenuity and technology meet. The result is a transformed, customised solution. Using the diverse range of experience from a wide range of industries, our experienced teams draw on this knowledge to design solutions that assist with optimising your current infrastructure and increase efficiencies. You only need to deal with one company - deMaher. We provide you, with a single point of contact who will manage your project from design to delivery. When you work with deMaher work, your project is strictly confidential. Discover how deMaher's 4D philisophy can work for you.
